

# SUMMER 2016 INTERNSHIP PROJECT

## **GEPLAN CONSULTING OFFER A SUMMER INTERNSHIP PROJECT IN ITS OFFICE IN FERRARA (ITALY)**

**TITLE:** EVIDENCES OF THURST BELT COLLAPSE INTEGRATING OUTCROP AND SUBSURFACE DATA

**DATASET:** offshore 2D seismic lines, well logs and outcrop data

**STUDY AREA:** eastern margin of the Tyrrhenian Sea

**DESCRIPTION OF THE PROJECT:** The Southern Apennines are a complex Thrust Belt that combines the present day presence of compressional, wrench and extensional tectonics. The objectives of the project is to identify evidences in the subsurface of the western coast of Southern Italy of the collapse of the Thrust Belt Edifice towards the Tyrrhenian Sea

The student will also:

- Organize and prepare a well and seismic dataset
- Interpret 2D seismic lines
- Correlate well logs
- Integrate outcrop data and present day stress field information

**PERIOD:** July – October 2016

**IF YOU ARE INTERESTED IN THIS OPPORTUNITY SEND YOU PRESENTATION LETTER AND YOUR CV AT: [students@geplan.it](mailto:students@geplan.it)**

**GEPlan Consulting**  
Petroleum GeoSciences

GEPlan is a consulting firm based in Italy and founded in 1998. Since 2003 GEPlan has opened a petroleum division that can provide innovative and integrated consulting services for international E&P companies operating in the oil business. GEPlan provides extensive domestic and international geoscience consulting for E&P activities, reservoir characterization and environmental analysis. GEPlan has rapidly become a consultant firm leader in Italy. From its base in Ferrara, the company covers the full range of E&P expertise and has been and continues to be involved in several industry-sponsored research projects related to reservoir characterisation.
