

Natural hydrogen: from geological curiosity to the primary energy source for our low-carbon future?

dr. Isabelle Moretti (Université de Pau et des Pays de l'Adour)

Friday November 5 (5 pm Rome time)

Room Geo3 – DiSTAR

<https://us02web.zoom.us/j/81275331168?pwd=cjFEeWxHMkpSZS9QUHZOQTJNUXNzQT09>

Webinar highlights: Hydrogen is today manufactured, but natural hydrogen exists. It has been up today found more or less *par hasard* when looking for water or oil. But the H₂ exploration is now starting and various geological settings are proven to be favourable. We will present an overview of what is known and what is still uncertain regarding the "hydrogen systems".

About the speaker: Isabelle Moretti has a long experience of research and exploration for energy resources, first at the IFPEN and then at ENGIE. She is now back at the academic world, leading a team dedicated to natural hydrogen at the Pau University (UPPA)
